Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a baculovirus and method of expressing a polypeptide in a host cell, classified in class 435, subclass 320.1.
- II. Claims 7-15, drawn to a method for detecting protein folding, classified in class 435, subclass 7.1.
- III. Claims 16-29, drawn to a method for screening for a compound for treating disease, classified in class 435, subclass 29.
- IV. Claims 30-45, drawn to a method for detecting a cell-lysis activity of a sample, classified in class 435, subclass 7.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because the recombinant baculovirus of Group I is not claimed as being used in the methods of Groups II-IV and the methods of Groups II-IV can be practiced without the baculovirus of Group I.

Inventions I and II-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because each is directed to a distinct, unrelated, outcome (i.e. expressing a polypeptide vs. detecting protein folding

vs. screening compounds for treatment of disease vs. detecting cell lysis activity of a sample) wherein each method possesses distinct step(s) unrelated to the steps of the other methods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Guzo, Ph.D., whose telephone number is (571) 272-0767.
